

## 3D Visualization and Animation

Contest Update – March 25, 2021

### Preparatory Information

Each team will access the contest prompt in the contest platform beginning on April 13, 2021. Once a team accesses the prompt, they will have 2 hours to complete the assigned tasks. Set up your recording in advance, and begin recording before opening the contest prompt.

Teams will record their workstation for the duration of the competition. The camera should be set up so that the entire workstation and both contestants are visible for the duration of the video. If a student needs to take a restroom, etc. break during the contest, they may do so, but only one team member may take a break at a time, and teams may not make up any time missed.

A storyboarding notebook is provided for each team. Use of this notebook is optional.

Submitted files must be in the designated format and named according to the [Virtual General Regulations](#).
